Springer International

Pflügers Archiv · European Journal of Physiology

Founded in 1868 as „Pflügers Archiv für die gesamte Physiologie des Menschen und der Tiere" by *E. F. W. Pflüger.* Edited by *M. Verworn, E. Abderhalden, A. Bethe, R. Höber, A. v. Muralt, H. Rein* et al.

Published: Vol. 1–29 (1876) Cohen und Sohn, Bonn; Vol. 30–92 (1901) E. Strauß, Bonn; Vol. 93–170 (1917) M. Hager, Bonn; since Vol. 171 (1918) Springer, Berlin.

Since 1920 Pflügers Archiv has included: „Archiv für Physiologie" (Archiv für Anatomie und Physiologie, Physiologische Abteilung). Founded and edited by Johannes Müller, E. du Bois-Reymond, W. v. Waldeyer-Hartz et al. 1877–1914. Veit und Co., Leipzig, since 1915, Vereinigung Wissenschaftlicher Verleger, afterwards Walter de Gruyter, Berlin.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US$ 0.20 per page, or a minimum of US$ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0031-6768, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of volume 412

This volume contains a supplement with the Abstracts of the 66th Meeting of the Deutsche Physiologische Gesellschaft, 21–24 September 1988, Würzburg R1–R98

No. 1–2 (pp 1–224) published June 29, 1988
No. 3 (pp 225–338) published July 29, 1988
No. 4 (pp 339–454) published August 30, 1988
No. 5 (pp 455–556) published September 21, 1988
No. 6 (pp 557–671) published October 12, 1988

Abstracts of the Annual Meeting of the Dutch Physiological Society, 18 March 1988, Utrecht S1–S5
Abstracts of the XIV Meeting (Spring Meeting) of the Società Italiana di Fisiologia, 27–29 May, 1987, Firenze S7–S32
Abstracts of the Joint Meeting of the Dutch Physiological Society and the Belgian Society for Fundamental and Clinical Physiology, 10 June, 1988, Leuven S33–S53

Taleb O, Feltz P, Bossu J-L, Feltz A: Small-conductance chloride channels activated by calcium on cultured endocrine cells from mammalian pars intermedia 641
Taniguchi J → Imai M et al. 557
Terada K → Ohya Y et al. 382
Tessitore L → Lovisolo D et al. 530
Thayer SA, Sturek M, Miller RJ: Measurement of neuronal Ca^{2+} transients using simultaneous microfluorimetry and electrophysiology 216
Thimm F, Ludwig I, Schöning L: Cardiorespiratory reflex responses to static contraction of vascularly isolated hindleg muscles of the rat 113
Thurau K → Beck F-X et al. 427
Trautmann A → Randriamampita C et al. 462
Trautwein W → Hescheler J et al. 248
Trautwein W → Belles B et al. 554
Trout NJ → Ashford MLJ et al. 297
Trube G → Rorsman P et al. 597

Ubl J, Murer H, Kolb H-A: Hypotonic shock evokes opening of Ca^{2+}-activated K channels in opossum kidney cells 551
Uemura N → Nishida Y et al. 535
Unger T → Mann JFE et al. 574

Vadrot S → Butlen D et al. 604
Van Doorn JE → De Haan A et al. 665
Van Doorn JE → Westra HG et al. 121
Van Driessche W → Krattenmacher R et al. 568
Van der Kloot, W: The packing of acetylcholine into quanta at the frog neuromuscular junction is inhibited by increases in intracellular sodium 258
Van Renterghem RJ, Van Steenhoven AA, Arts T, Reneman RS: Deformation of the dog aortic valve ring during the cardiac cycle 647
Van Steenhoven AA → Van Renterghem RJ et al. 647
Völkl H, Lang F: Ionic requirement for regulatory cell volume decrease in renal straight proximal tubules 1

Walsh Jr JV → Kirber MT et al. 339
Wangemann P → Wittner M et al. 516
Weizsäcker HW: Passive elastic properties of the rat abdominal vena cava 147
Westerhof N → Duwel CMB 409
Westra HG, de Haan A, van Doorn JE, de Haan EJ: Anaerobic chemical changes and mechanical output during isometric tetani of rat skeletal musle in situ 121
Whittembury G, Malnic G, Mello-Aires M, Amorena C: Solvent drag of sucrose during absorption indicates paracellular water flow in the rat kidney proximal tubule 541
Whittembury G → Carpi-Medina P 66
Wiederholt M → Helbig H et al. 80
Wiederholt M → Korbmacher C 29
Willis RJ → Headrick J 618
Witte H, Zwiener U, Rother M, Glaser S: Evidence of a previously undescribed form of respiratory sinus arrhythmia (RSA) – the physiological manifestation of "cardiac aliasing" 442

Wittner M, Di Stefano A, Wangemann P, Nitschke R, Greger R, Bailly C, Amiel C, Roinel N, De Rouffignac C: Differential effects of ADH on sodium, chloride, potassium, calcium and magnesium transport in cortical and medullary thick ascending limbs of mouse nephron 516

Yamaguchi K → Ohya Y et al. 382
Yoshida S → McNiven AI et al. 451
Yoshitomi K → Imai M et al. 557

Young AA, Dawson NJ: Effects of environmental temperature on the development of a noradrenergic thermoregulatory mechanism in the rat 141

Zeh R → Lückhoff A et al. 654
Zeisberger E, Roth J, Simon E: Changes in water balance and in release of arginine vasopressin during thermal adaptation in guinea-pigs 285
Zeisberger E → Cooper KE et al. 292
Zimniak P → Montrose MH et al. 164
Zwiener U → Witte H et al. 442

Subject index

Abdominal myotomes 524
Acetazolamide 1
Acetylcholine 240
Acetylcholine 240
Acetylcholine 462
Acetylcholine 509
Acetylcholine (ACh)-quanta 22
Acetylcholine quanta 258
Acetylcholine receptor channel 211
Acetylcholine-receptor 22
Action potentials 530
Activation 634
Active vasodilatation 106
Acute exercise 101
ADP 455
Adenine nucleotides 121
Adenosine 618
– release 106
Adenylate cyclase 363
Adrenaline 258
Aequorin 195
AGE-related changes 665
Alanine 7
Alkaline phosphatase inhibition 482
Alkalinization 369, 613
Alpha-adrenergic receptor 75
Amiloride 80, 568
Ammonium chloride 503
Amphibian skin 305
ANP providing system 535
Anabolic processes 397
Anaerobic metabolism 121
Analogues of diaclyglycerol 462
Angiotensin 574
Angiotensin II 448
Angiotensin II antagonist 448
Anion transport 305
Anisotropy 147
Anterior hypothalamus 141
Antibiotics nonactin/monactin 359
Antidiuretic hormone 42
Antipyresis 292
Aortic cell 448
– endothelium cells 469
– valve 647
Apamin 422
Apical membrane 568
– – voltage 634
Aplysia neurone 240
Arginine vasopressin 285, 292
Ascending limb of Henle's loop 516
Aspartate aminotransferase 417
ATP 331, 469, 654, 665
– concentration 455
ATP^{4-} 37
ATP · Mg 37
ATP-sensitive ion channels 297
– K^+ channel 37
Atrial natriuretic peptide 535
Auditory cortex 12
– stimuli 12
Autonomic nervous system 128
AV block 618
Azelainylcholine 211
A10 cell line 29

B

BAY K 8644 597
Ba^{2+} 422
Ba^{2+} 497
Ba^{2+} currents 597
Balb/c 3T3 fibroblasts 530
Barium 1, 369
Bicarbonate 1, 369
Bile acids 164
Biorhythmus 442
Blood flow 106
– rheology 93
– volume 354
Body temperature 292
Bradycardia 618
Bradykinin 654
Brain neurons 292
Brom 305
Brush border membrane transport 482
2,3-Butanedione monoxime (BDM) 659

C

Ca action potential 451
Ca release 382
Ca uptake 211
Ca^{2+} 530
Ca^{2+}-activated contractions 225
– K channels 548
Ca^{2+}-activated K^+ channels 422
Ca^{2+} channel(s) 390, 597
Ca^{2+}-current 554
Ca^{2+}-Dependent potassium 469
Ca^{2+} ions 339
"Ca^{2+}-jumps" 231
Ca^{2+}-mediated K conductance 451
Ca^{2+} release 451
Ca^{2+} transients 195
$^{45}Ca^{2+}$ transport 277
Ca-channel currents 668
Ca-channels 668
Ca-dependent channels 462
– protease calpain 554
Caffeine contracture 390
Caffeine-sensitive calcium store 376
Calcium 75, 164
Calcium, internal 641
– channels 328
– concentration 503
– current 248
– on renin release 503
– sensitivity 253, 331
– store 376
– uptake 211
Calcium-activated K-channels 331
Calcium-dependent K^+ channel 469
Calmodulin antagonists 253
Calpain I/II 554
Calpastatin 554
cAMP 54, 568
Capacity transients 445
Capillary 93
Captopril 574
Carbon dioxide 183
Carboxylation 7
"Cardiac aliasing" 442
– calcium channels 328
– cycle 647
– muscle cell 248
myocyte(s) 248, 328
– output 548
Cardiorespiratory reflex responses 113
– reflexes 113
Cations 211
Ca-transport, renal 516
CDPC 568
Cell cations 497
– electrolyte concentrations 427
– potential 369
